Deck boards are net 1-5/8" x 5-5/8".

Mantis Clip System installation—ProDek-Reversible and ProDek-PVC

Starter Clip

1. Line up the back of the Starter Clip in position for the first deck board. Fasten the clip to the joist with the supplied screws.
2. Slide deck board groove into the Starter Clip tab.

Mantis Clip

3. Slide the Mantis Clip into the deck board groove and fasten the clip to the joist with the supplied screws. Repeat this step with each consecutive deck board in the installation.

Finishing Clip

Trim the last deck board to fit, either flush with the outside edge of the

rim joist or with an overhang. The Finishing Clip can be installed in one of two ways:

4. Deck boards that are flush to the outside edge of the rim joist.
5. Deck boards that overhang the rim joist.
