- Easy to clean, low maintenance
- Limited lifetime warranty
- Available in 12', 16' and 20' lengths
- Boards are 1-5/8" x 5-5/8"
- ICC NER-571

# Super ProDek™—The weather resistant solution

## Advanced technology for long-term peace of mind

Arndt & Herman® **Super ProDek** is the next generation decking product. Through a cap stock dual extrusion process, a layer of acrylic is permanently bonded to the copolymer substrate. This revolutionary process has now been adapted to decking materials giving you unsurpassed weathering performance and fade resistance.

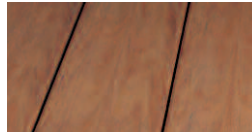

## Maintenance and care

Though Arndt & Herman **Super ProDek** will never need staining, sealing or painting, a routine cleaning to remove airborne and wind-blown elements is necessary to maintain its beauty. Just sweep and wash regularly to reduce buildup of dirt, mud or grease caused by normal use.

For additional cleaning tips, please contact our Customer Service Department 1-866-204-3139.

## Two exciting color options

**Super ProDek** comes in both Driftwood Gray and Oak woodgrain colors. The deep embossed woodgrain texture is further enhanced by the infinitely random color variation simulating tropical hardwoods.

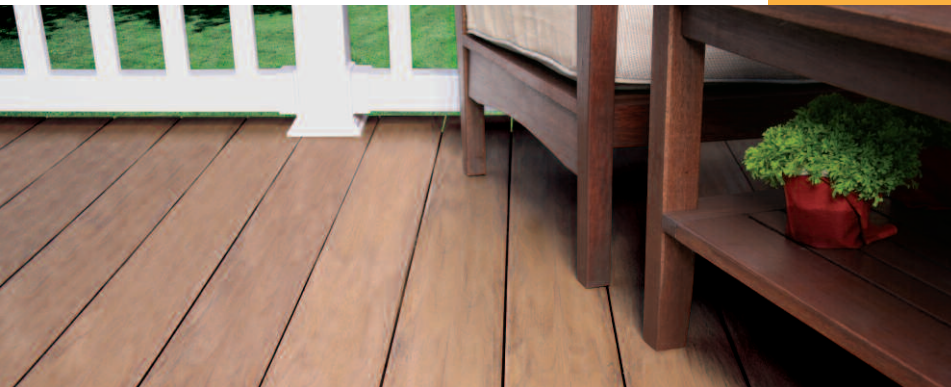

Oak Wood

Driftwood Gray

## Arndt & Herman money saving solutions

When you order several product categories between delivery dates, we'll ship them all together to save you money on multiple shipments.

### 2" x 6" Deck Board

- Ribs add strength
- Meets code on 24" joists
- Hollow webbing keeps deck cooler to touch
- Nailing flange keeps all fasteners hidden

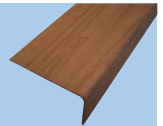

### 2" x 6" Deck Boards

- The interlocking nailing flange provides uniform spacing between boards
- Comes punched for draining or non-punched to keep area below decks dry

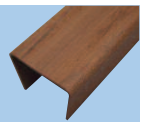

### L-Trim

- Used primarily to cover the edge of a board that has been ripped. Attaches with woodgrain trim screws.

### C-Trim

- Used primarily to cover the end of a board. Attaches with woodgrain trim screws.
